Meeting on further integration of RES and promotion of EE in Canary Islands

On 25th November, 2016 Canary Islands Institute of technology (ITC) had a meeting with the participation of the Las Palmas de Gran Canaria University (ULPGC) in order to discuss possibilities for further integration of renewable energies (RES) and promotion of efficiency and energy saving in the Canary Islands.

Meklē Dziesmu un deju svētku vēstnešus Zemgalē

12. APRĪLIS, 2018

Līdz 22. aprīlim Zemgales tautumeitas un tautudēli, kuri sevi uzskata par Dziesmu un deju svētku patriotiem, aicināti piedalīties konkursā un kļūt par sava reģiona svētku vēstnešiem. Kopumā tiks izraudzīti pieci vēstnešu pāri – pa vienam pārim Kurzemē, Latgalē, Vidzemē, Zemgalē un Rīgā –, kuri tiks...

Pils salā būvē skatu torni 1

12. APRĪLIS, 2018

Pils salā aprises sāk iegūt koka skatu tornis. «Šobrīd jau uzstādītas torņa nesošās konstrukcijas un uzsākta pārsegumu, kāpņu, margu montāža,» skaidro uzņēmuma «Smart energy» projektu vadītājs Mārtiņš Ducens. Viņš lēš, ka tornis varētu tikt pabeigts pāris nedēļu laikā, bet labiekārtošanas darbi...

Objectives
Summary/project overview
Pilots
Replicators

The BEAST project will be the first step in closing the implementation gap of SEAPs. The project will: 1) establish structures for efficient delivery of SEAPs, 2) identify and prepare 23 bankable sustainable energy projects, and 3) implement actions leading to measurable energy savings and/or increase renewable energy sources supply. Estimated investments due to BEAST is close to € 45 million and reduced emissions of GHG is estimated to about 24 000 tCO2 per year.

Local actors in nine European countries will be addressed and supported in their daily work by coaching and a 'learning-by-doing' approach to boost the implementation of SEAP actions. The local actions identified for the BEAST project differ widely, thus reflecting the complexity and daily reality for local and regional authorities addressing the different targets set in SEAPs. Exchange of experience of tutoring and best practice implementation methods and processes will be shared in four clusters among partners and their target groups across Europe.

Energy Forum

Home	About PentaHelix	Share your ideas here - Climate Forum	Newsletters	Project library	Contacts Consortium
-------------	-----------------------------	--	--------------------	------------------------	--------------------------------

1. Climate Forum is Organized as in LinkedIn/Facebook - having the latest material on top and older – when scrolling down.
2. It has to be easy to write some sentences/paragraph (up to 60 words) - as in LinkedIn/Facebook, to add a picture(one-main picture – not gallery here), word and pdf files, if a larger material is being shared. Videos are added as youtube links.
3. It has to be easy to share picture with description.
4. Only registered users could leave messages, comment and their name is visible by the comment.
5. Each registered user can initiate a new topic
6. Links can be pasted in to refer to other sources of information

Additional specifications for “Climate Forum”

6. Message window should also have button “topic tag” with drop down menu. This should be obligatory to fill in –if not filled, the notification window should pop out “tag area to be filled”; person can click 1 or 2 tags.
Administrator should have possibility to add new tags per necessity:
 - Energy planning
 - Energy efficiency
 - Renewable energy
 - Green transport
 - SECAP
 - CO2
7. Message window should have also button ‘key words’
8. The Forum information is stored as in LinkedIn/Facebook - having the latest material on top and older – when scrolling down. About one month information is stored in such a way -down, later automatically sorted per tags in the same way – the newest material on top.
9. Search option should be able to find materials – per tags and per key words
10. After each written message there would have to be “translate” button which would offer options to google translate to the browser language, or to English.

11. Next to the materials attached to the message the download button would have to be inserted.
12. The date of posting should appear under the post (small letters)
13. The most interesting topics/comments are cherry picked by the dissemination partners for front page - news : if possible in the right top corner of the message, there is also tool/button «publish in news section», which could be used only by administrators.
14. Platform operator/administrator (OFK) facilitates the dialogue, controls the situation, erases something if necessary etc. in case of spam or misuse of platform. Each country partner will nominate one person – moderator - to overview discussions in their language. Website would provide e-mail notifications to the moderator of the concrete language, (with exception of OFK, which moderates all, also discussions in English).

Project Library

- Library (we will not use the word «deliverables», but store them under the name «library»)

Mapping H&C Demand and Supply

- D2.1 Models for mapping and quantifying current and future H&C demand in cities
- D2.2 Geospatial dataset of hourly variation of HDH and CDH for validation cities, including UHI phenomena
- D2.3 Extension of geospatial dataset of hourly variation of HDH and CDH to additional 50 cities
- D2.4 Database for retrofitting and energy efficiency measures
- D2.5 Models for mapping and quantifying energy potential from RES
- D2.6 Models for mapping and quantifying energy potential from waste energy sources at urban level
- D2.7 Models for quantifying industrial excess heating and cooling
- D2.8 Models for spatially prioritising the potential of energy saving, low carbon heating and cooling and excess heat
- D2.11 Release of mapping module prototype

Energy planning – Scenarios Selection and Simulation

- D3.1 Algorithms for energy planning
- D3.2 Heating and cooling demand simulator – residential sector
- D3.3 Energy demand simulator – transport sector
- D3.4 Heating and Cooling suppliers simulator
- D3.5 DHC Route Optimizer
